

Abderrahim El Ouariachi Penetration Tester & Laravel Developer

+212623960018 abderahimouriachi@gmail.com Nador, Morocco

Portfolio: itsabderrahimel.github.io/Portfolio/ Github: github.com/itsabderrahimel

Professional Summary

Penetration Tester and Laravel-focused full-stack developer with hands-on experience in web application exploitation and secure application development. Ranked in the top 1% on Hack The Box Academy, with 300+ successfully completed labs and targets across web, Linux, and infrastructure attack surfaces. Proven ability to design, build, and secure web applications by applying real-world attacker methodologies [OWASP] throughout the software development lifecycle.

Experiences

Ethical Hacking Practitioner

HackTheBox Training Sep 2023 - Present

- Participate in Capture The Flag [CTF] challenges to enhance cybersecurity and penetration testing skills.
- Practice exploiting real-world vulnerabilities across web, network, and system targets.

Full-Stack Laravel Developer

Higher School of Technologie of Oujda Internship Jun 2024 – Aug 2024

- Led a 5-member intern development team in delivering a Laravel-based academic administration platform, reducing administrative task processing time by approximately 50%.
- Designed core application architecture [authentication, role-based access control, CRUD workflows].
- Improved administrative data handling by consolidating fragmented processes into a single system.

Laravel Web Developer

SoftCactus Internship Jun 2023 – Jul 2023

- Developed an integrated client communication platform embedded into the company's main website, improving communication flow and reducing response delays.

Technical Skills

Web Development

Laravel [REST APIs, MVC architecture]
Vue.js, Inertia.js, Vite, TailwindCSS
MySQL, database design, query optimization
Docker [local development & deployment]
Git [team workflows, code reviews]

Penetration Testing

Web Application Penetration Testing [OWASP Top 10]
Vulnerability Assessment & Exploitation
Linux systems enumeration
Secure Code Review Methodology
Reporting & Communication

Education

Bachelor's Degree in Computer Science – With Honors

Higher School of Technology of Oujda Sep 2021 – Sep 2024

- Built a solid foundation in core computer science concepts and problem-solving.

Projects

Guess Royal Game

- Laravel-based web game designed as a hard CTF challenge demonstrating second-order SQL injection risks, emphasizing secure query handling and safe data persistence.

PenGate

- Collaborative forum for penetration testers to share knowledge and techniques, built with Laravel, Vue.js, and Inertia.js in a Dockerized environment using Laravel Sail.
