

Abderrahim El Ouariachi

Laravel Full Stack Developer & Penetration Tester

Full-stack developer and penetration tester working across modern web applications and their infrastructure. Recently completed a black-box pentest on a multi-tenant AI platform as the sole security engineer, uncovering 50+ vulnerabilities including RCE, IDOR, and OWASP API Top 10 issues. Combines hands-on development with offensive security expertise to identify weaknesses and strengthen systems.

Experience

DevSecOps Engineer

WebCom — Contractor

Mar 2026 – Apr 2026

- Automated infrastructure provisioning with Ansible for scalable, zero-drift deployments.
- Hardened servers using firewalls, Fail2Ban, and least-privilege access via Ansible.
- Sole DevSecOps owner, leading infrastructure, security, and CI/CD end-to-end.

Laravel Security Analyst

WebCom — Contractor

Feb 2026 – Mar 2026

- Conducted black-box pentest on a multi-tenant AI Laravel app, uncovering 50+ vulnerabilities.
- Identified OWASP API Top 10 issues, RCE, IDOR, and other critical flaws.
- Applied hands-on offensive security skills in a real-world production environment.

Laravel Full Stack Web Developer

Higher School of Technology — Internship

Jun 2024 – Aug 2024

- Led a 4-person intern team to deliver a full-stack web app for EST Oujda.
- Built the app with Laravel, Blade, and Tailwind CSS (modern, responsive UI).
- Mentored team, driving collaboration, communication, and problem-solving.

Ethical Hacking Practitioner

HackTheBox — Practice

Sep 2023 – Present

- Participated in CTF challenges to strengthen penetration testing skills.
- Exploited real-world web, network, and system vulnerabilities.
- Gained cybersecurity knowledge through mentorship and guidance from industry experts.

Projects

Cybersecurity WriteUps

Curated HackTheBox writeups covering exploitation, privilege escalation, and CTF techniques.

PenGate Forum

Built collaborative pentesting forum using Laravel, Vue.js, and Inertia.js in a Dockerized Laravel Sail environment.

Guess Royal Game CTF

Built a Laravel-based CTF guessing game demonstrating second-order SQL injection and secure query handling.
